1. Login/Register
2. Download Original Datasets
3. Apply Privatization Method
4. Fill-out Privatization Technique Metadata
5. Upload Privatized Datasets
6. Evaluation
7. Manage Submission
8. Search Submission in Ranking
9. Public Dashboard

1: Login/Registration

Click on Login

The image shows a screenshot of the PrivBench website's login and registration interface. At the top, there is a navigation bar with the 'PrivBench' logo on the left, and links for 'Rankings', 'Submission', and 'How does it work?' in the center. On the right side of the navigation bar, there is a 'Login' button with a right-pointing arrow icon, which is highlighted by a red box and a red callout bubble pointing to it from the top right. Below the navigation bar, the main content area features a central login form titled 'Login to PrivBench'. This form contains two input fields: 'Username *' and 'Password *'. Below these fields is a blue 'Login' button. Underneath the 'Login' button is the text 'or' and a 'Create new account' button, which is highlighted by a red box and a red callout bubble pointing to it from the bottom center. The callout bubble contains the text 'To Register a new Account'.

Model Evaluation

Download Datasets

Please download all the original datasets provided. The datasets contain sensitive information, and your goal is to apply a data privatization method of your choice to ensure the privacy and security of the data.

Once the privatization process is complete, save the resulting privatized datasets. You will need to upload them in the final step of this workflow.

Important: Replace the textual data column with the privatized data while keeping all other columns unchanged and in their original order. This ensures that the benchmarking process functions correctly and handles the datasets as intended.

Dataset	Status	Actions
test_original.csv	Not Downloaded	☒
		Select All ☒

Please make sure you have downloaded the datasets before proceeding to the next step!

Step 3: Apply Privatization Method to Datasets

on your local machine...

1. For each of the downloaded dataset run it through your privatization model
2. Make sure the output dataset has same number of rows and columns in .csv
3. Keep them ready for the next steps...

Step 4: Fill out Model Description
